

How to Compare ADHD Tests: *A Practical Checklist*

Use this short checklist to help evaluate potential ADHD testing tools and technologies and see if they're a good fit for your clinic.

1

What *age range* is the test validated for?

2

What *symptoms/behaviors* does the test measure?

3

What *type of data* is collected (objective, subjective, cognitive)?

4

Are results *benchmarked* against normative data?

5

Does it have the
necessary *regulatory*
clearances?

6

Is there *published evidence*
supporting the test?

7

**Can the test be used
*remotely or with
telehealth?***

8

***How long does the test
take to complete?***

9

What *hardware or supporting technology* is required?

10

How are *results and data* presented?

11

What are the *cost and licensing* arrangements?

12

How would the
technology fit with
your *existing workflow*?
